

ROOHAN KHAN

Full Stack Developer (Laravel / PHP)

Karachi, Pakistan • +92 315 2759433 • roohank8@gmail.com • linkedin.com/in/roohan-khan8

PROFESSIONAL SUMMARY

Full stack developer with hands-on experience building and maintaining web applications end-to-end using PHP and Laravel, from database design and REST APIs to Blade-based front-end views and admin interfaces. Experienced across the full project lifecycle — feature development, admin panel/UI work with Laravel Nova, Statamic, and Filament, query optimization, and role-based access control. Comfortable working independently and within a team to take projects from requirements to deployment, with growing exposure to .NET and a strong track record of picking up new tools quickly.

TECHNICAL SKILLS

Languages: PHP, JavaScript, SQL, C# (.NET), Python

Full Stack Framework: Laravel (Blade templating, routing, Eloquent ORM), Laravel Nova, Statamic, Filament

Front-End: HTML5, CSS3, JavaScript, Blade components, responsive admin UI development

APIs & Architecture: RESTful API design and development, third-party API integration, MVC architecture

Databases: MySQL, MongoDB, Firebase, query optimization, relational data modeling

Practices & Tools: Git version control, code reviews, debugging & testing, authentication & authorization (RBAC), technical documentation

WORK EXPERIENCE

Jr. Full Stack Developer — Klabs

Feb 2026 – Present

- Develop end-to-end features for web and mobile applications using PHP/Laravel — from database schema and RESTful APIs to Blade-based views and admin interfaces.
- Build and maintain full-stack admin panels and content workflows using Laravel Nova, Statamic, and Filament, troubleshooting and testing to ensure optimal application performance.
- Collaborate with cross-functional teams (frontend, mobile, and product) to understand requirements and implement complete features spanning UI, APIs, and database solutions.
- Participate in code reviews, document API endpoints and technical solutions, and follow best practices to maintain code quality across client projects.

Full Stack Developer — Digital Marketing 30

2025 – Jan 2026

- Rebuilt theber.com end-to-end in Laravel — backend architecture, Blade views, and workflows — using a modular, scalable design.
- Designed role-based access control (RBAC) for multiple user types, including builders, raters, modelers, admins, and students.
- Optimized SQL queries on a large production database, reducing load and improving application response times.
- Developed and maintained APIs supporting user workflows, plan management, and full project lifecycle operations, plus a complex file system for project files, plans, and student submissions.

Backend Developer — NED Scholars — Logbook Web Application (Django)

2023 – 2024

- Engineered the backend for a university logbook system used for thesis and research entry tracking.
- Implemented authentication layers and role-based user access.
- Designed relational data models enabling structured logs, categories, and record versioning.
- Built Django views and templates supporting efficient data retrieval and record management.

EDUCATION

BS in Computational Finance — NED University, 2022 – 2026

Major coursework: Mathematics, Finance, Statistics | GPA: 3.2

CERTIFICATIONS

- DataCamp — Python
- SoloLearn — Web Development
- Kaggle — SQL

LANGUAGES

English (Fluent)
