

ROOHAN KHAN

Associate Software Engineer – Backend

Karachi, Pakistan • +92 315 2759433 • roohank8@gmail.com • linkedin.com/in/roohan-khan8

PROFESSIONAL SUMMARY

Backend software engineer with hands-on experience designing and developing scalable, secure applications and RESTful APIs using PHP (Laravel) and growing expertise in .NET/C#. Comfortable writing clean, maintainable code, participating in code reviews, troubleshooting and testing applications, and collaborating with cross-functional teams to translate requirements into working software. Strong foundation in database design, query optimization, and software documentation, with a consistent track record of learning new technologies quickly.

TECHNICAL SKILLS

Languages: PHP, C# (.NET), Python, SQL, JavaScript

Backend Frameworks: Laravel, Laravel Nova, Statamic, Filament, .NET Core, Django

Web Services & APIs: RESTful API design and development, third-party API integration, MVC architecture

Databases: MySQL, MongoDB, Firebase, query optimization, relational data modeling

Practices & Tools: Git version control, code reviews, unit testing & debugging, authentication & authorization, technical documentation, agile collaboration

WORK EXPERIENCE

Jr. Backend Developer — Klabs

Feb 2026 – Present

- Design and develop backend systems and RESTful APIs for web and mobile applications using PHP/Laravel, writing clean, scalable, and efficient code under guidance from senior developers.
- Build and maintain admin panels and content workflows using Laravel Nova, Statamic, and Filament, troubleshooting and testing to ensure optimal application performance.
- Collaborate with cross-functional teams (frontend, mobile, and product) to understand requirements and assist in implementing web services, APIs, and database solutions.
- Participate in code reviews, document API endpoints and technical solutions, and follow best practices to maintain code quality across client projects.

Backend Developer — Digital Marketing 30

2025 – Jan 2026

- Rebuilt the backend of theber.com using Laravel with a modular, scalable architecture.
- Designed role-based access control (RBAC) for multiple user types, including builders, raters, modelers, admins, and students.
- Optimized SQL queries on a large production database, reducing load and improving application response times.
- Developed and maintained APIs supporting user workflows, plan management, and full project lifecycle operations, plus a complex file system for project files, plans, and student submissions.

Backend Developer — NED Scholars — Logbook Web Application (Django)

2023 – 2024

- Engineered the backend for a university logbook system used for thesis and research entry tracking.
- Implemented authentication layers and role-based user access.
- Designed relational data models enabling structured logs, categories, and record versioning.
- Built Django views and templates supporting efficient data retrieval and record management.

EDUCATION

BS in Computational Finance — NED University, 2022 – 2026

Major coursework: Mathematics, Finance, Statistics | GPA: 3.2

CERTIFICATIONS

- DataCamp — Python
- SoloLearn — Web Development
- Kaggle — SQL

LANGUAGES

English (Fluent)
